

OTK-4000 Inspection Toolkit for counter surveillance

OTK-4000 Inspection Toolkit for counter surveillance

Counter surveillance Inspection Toolkit OTK-4000 is a professional set with tools for detection of electronic devices .

A wide variety of tools allows for an accurate inspection of hard to reach places such as furniture, holes, fixtures, floors or ceilings. The tools in the set are made of high quality materials providing the best control and precision. The set can be used with all types of non-linear junctions detectors. The set contains all of the necessary tools required for counter surveillance operations, especially in hard-to reach places.

Inbox
