

The Complete TSCM Physical Search Kit

The Complete TSCM Physical Search Kit

The Complete TSCM Physical Search Kit is a professional set with tools for detection of electronic devices .

The Physical Search Kit (PSK) is a portable, compact set of equipment, tools and supplies to perform TSCM physical searches. All TSCM sweeps include a physical search to look for hidden electronic surveillance devices. The PSK ensures you have the right tools, with more than 50 items to do a complete and efficient investigation.

Inbox
